

## Filling System **Fluid Filling Gravitec**

Aqua & Solvent Based Components  
The revolution in small batch filling.  
No cleaning after batch changing needed.  
Increasing productivity up to 100%.

The filling system Fluid Filling Gravitec is an automatic filling system for small batches. This system is special designed to minimize setup times. By the use of a special inliner, the complete cleaning process is no longer required.

**Advantage of small batch production**

- Produce only the requested amount
- No over-production to make the process more efficient
- No storage of special products
- Optional automatic de-stacking and palletizing

**Benefits of the Fluid Filling Gravitec**

- Filling of small batches with minimized cleaning work
- Batch change possible in 2 minutes
- Intermediate container with specially designed filling inliner
- Filling valve integrates the inliner, therefore no cleaning during product changeovers
- No wetted parts need to be cleaned
- Intermediate container optionally possible with vibration filtration
- Automatic container handling 3-30 liters with buffer zone
- Filling control with calibration approval possible

## Technical Data

- Perfect for batch sizes from 100 to 3000 l
- Buffer zones for empty and filled containers
- Filling capacity up to 10 containers per minute
- Ground size approx. 1,5x6,0 mtr
- ATEX-version optional possible

For your benefit we would like to send you a quotation based on your specification concerning a new dispensing system. Please do not hesitate to contact us at any time, because we will find the best solution for your requirements profile.
